How to AirPlay videos from iPhone/iPod/iPad to computers

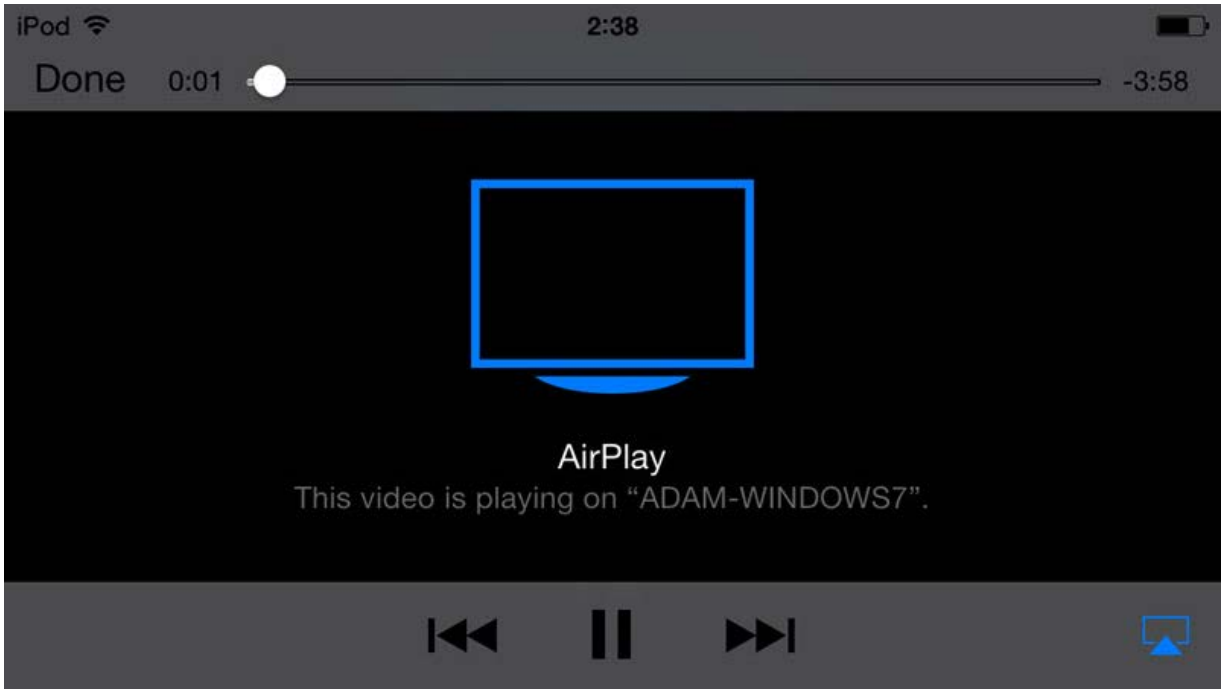
Make sure your computer and iPhone/iPad/iPod are in the same network before you can use AirPlay.

Step One: First, you need to run 5KPlayer on your Windows PC. After you've added your AirPlay-enabled devices like iPhone, iPad and Windows to the same network, they can automatically detect all its receivers.

Step Two: You just need to swipe up from the bottom of your screen to access control center and tap AirPlay. A list of AirPlay enabled devices will appear. Choose the name of your PC to connect. Or you can AirPlay during your playback on your iPhone/iPad/iPod, simply click the icon on lower right of your iPhone/iPad/iPod screen, choose the computer you want to AirPlay to.

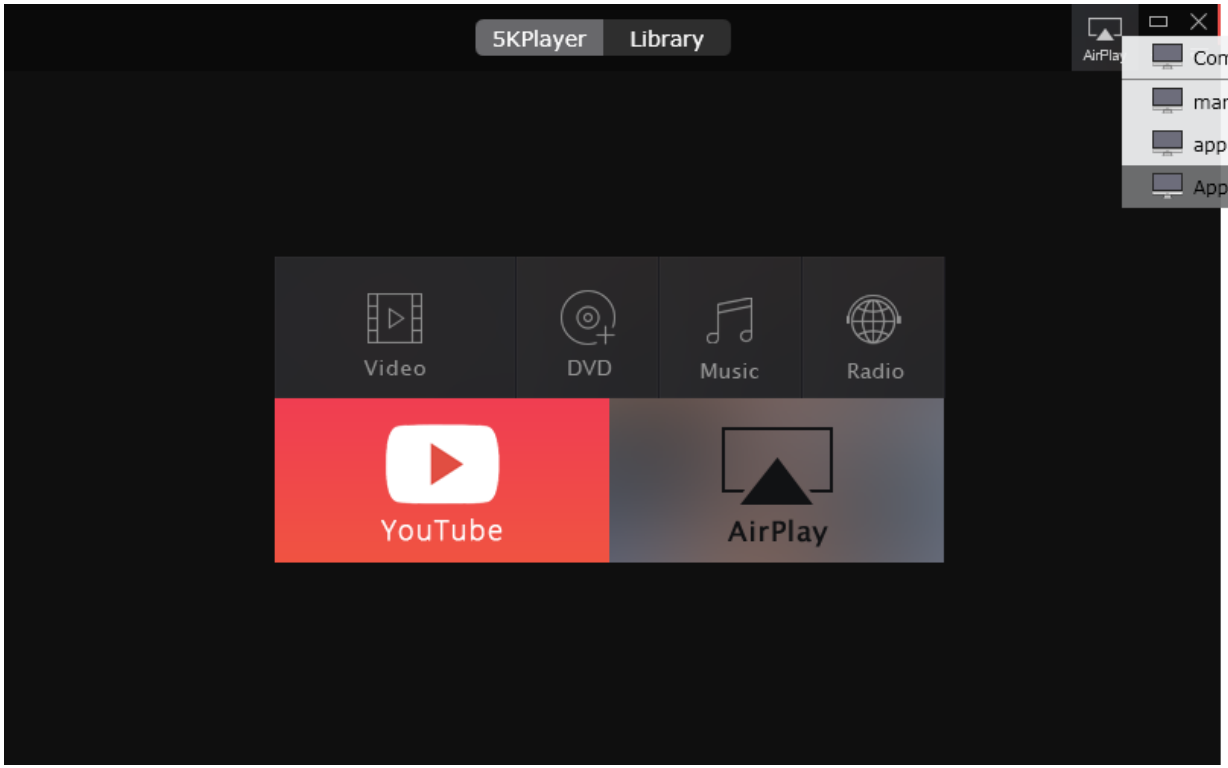
Tips: 1. If you are running an AirPlay-enabled application, such as YouTube, Netflix, Spotify, etc, the AirPlay icon will be visible in the video's navigation bar, you just need to tap the icon and choose the devices you would like to AirPlay to.
2. It is not suggested to turn on "Mirroring", because 5KPlayer does not support mirroring iPhone/iPad/iPod screen at this moment.

Step Three: Once you tap the name, you are connected to the computer and could immediately begin streaming video music from AirPlay-enabled devices and apps to 5KPlayer and watch your media files on bigger screen.



How to AirPlay videos from computer to computer/Apple TV?

Make sure your two computers are in the same network signal before you can AirPlay.



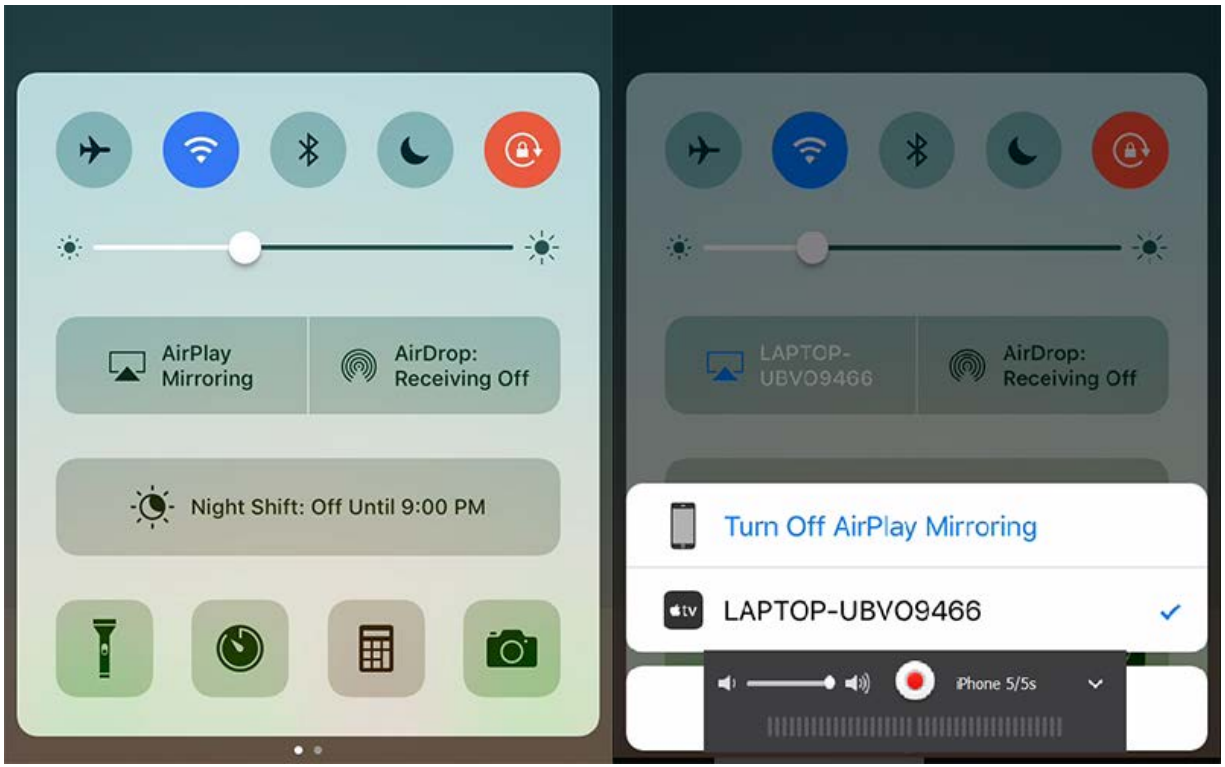
Step One: Double Click 5KPlayer, AirPlay tab is on the upper right corner of the interface. Click AirPlay tab and choose the Apple TV from the drop-down menu. If you have multiple Apple TVs on your network, select the one to which you would like to mirror. Once the AirPlay is enabled the AirPlay tab will turn red.

Step Two: Add Video/Music to the program and it will automatically AirPlay to the computer/Apple TV you connect. You can also AirPlay during video music playback on your computer. Just click Airplay and choose the computer/Apple TV you want to AirPlay.

Note: Currently, AirPlay only supports videos in MP4, M4V, MOV and music in MP3, AAC. If you need to AirPlay DVD, MKV, M2TS, AVCHD, AVI, WMV, FLV, etc, you need the assistance of video converter software to convert your DVDs and video files to the format for AirPlay.

How to AirPlay mirror record iPhone iPad screen on computers

Mirroring & recording iPhone iPad screen on computer is aided by AirPlay.

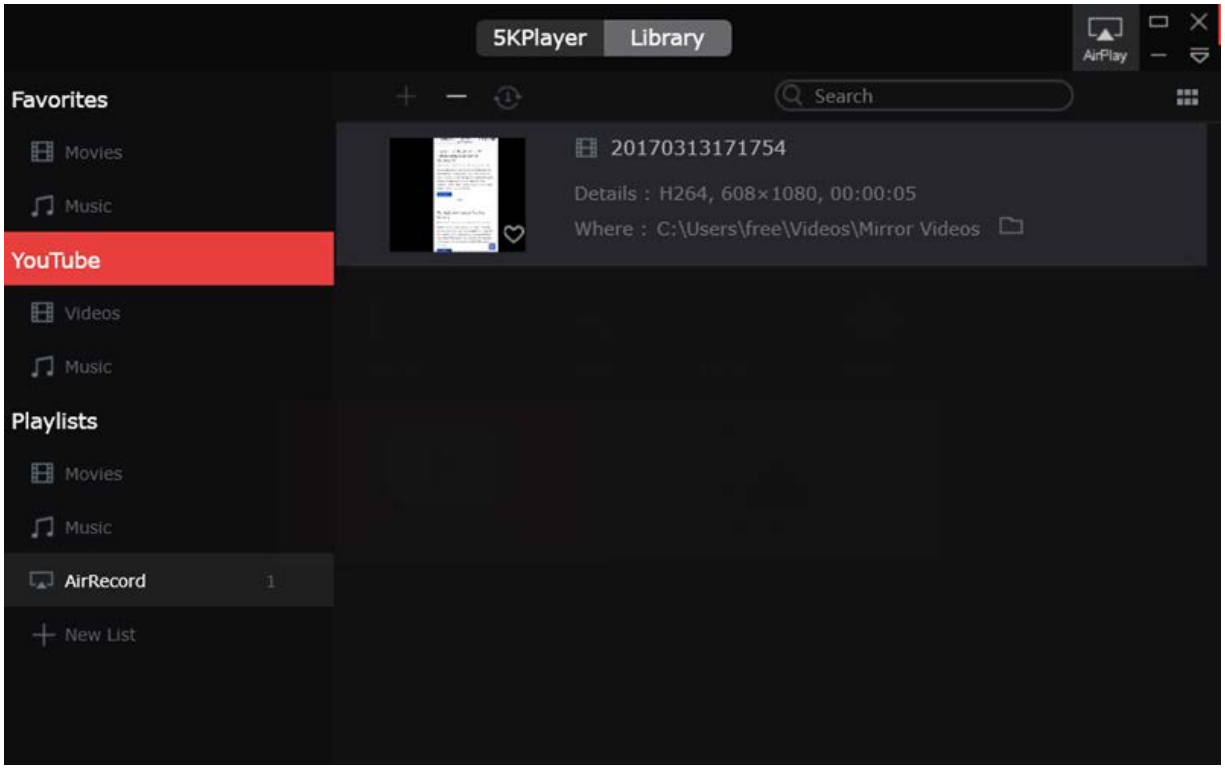


How to Mirror: Launch 5KPlayer on your computer. Swipe up from the button of your iPhone iPad to open the Control Center. Then click "AirPlay Mirroring" to connect iPhone iPad with 5KPlayer.

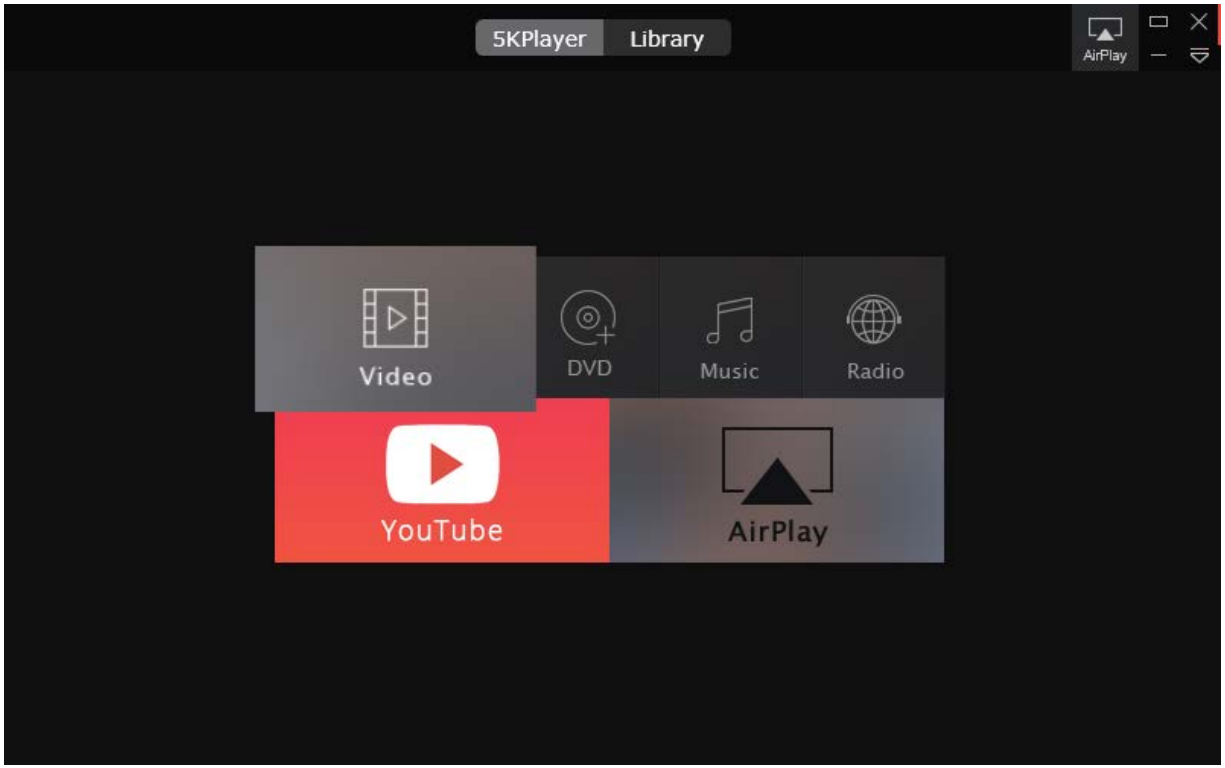
Tips: Mirroring is set up as default when active AirPlay after iOS 10.

How to Record: If you need to record iPhone iPad screen, just hit the red circle on the computer to start recording. When you complete recording, click the icon again. The recorded video will show in "AirRecord" playlist on Library.

How to Stop Mirroring: Once you finish mirroring, go straight to Control Center of iPhone iPad, and choose "Turn Off AirPlay Mirroring" to stop screen mirroring on computer.



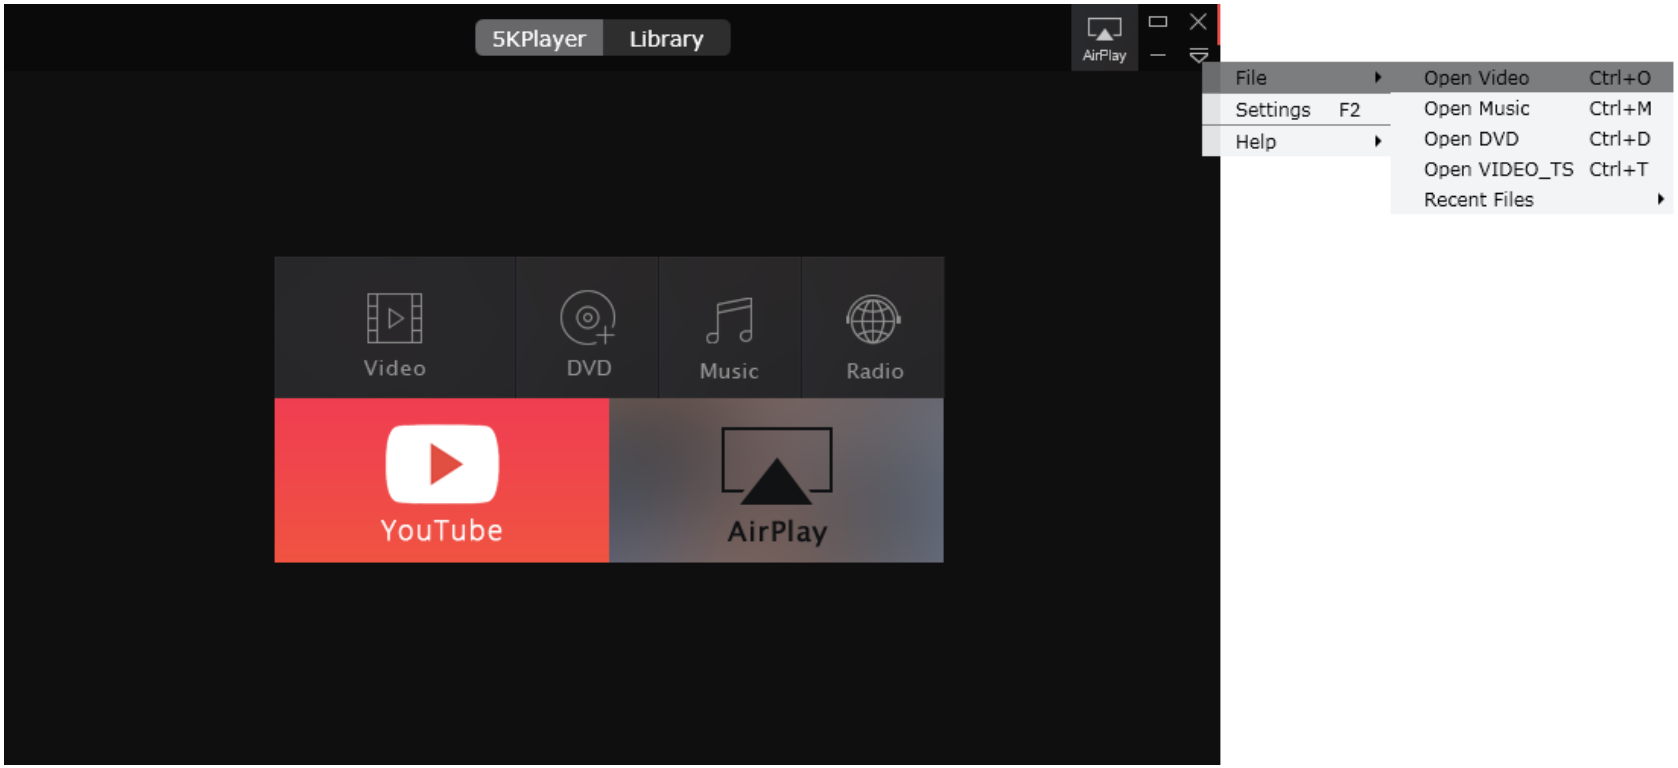
How to add video/music for playback?



There are several ways to add videos/music for playback:

1. Add Video/Music from the program. Click the Video or Music icon on the main interface of 5KPlayer, choose the video or music you want to play and press Open. You can also double click the video or music to enable playing.

2. Add Video/Music from Menu. Go File ->Open Video or Open Music



3. Add Video/music via "Drag and Drop" Drag and Drop the video/music to the main interface or program icon.

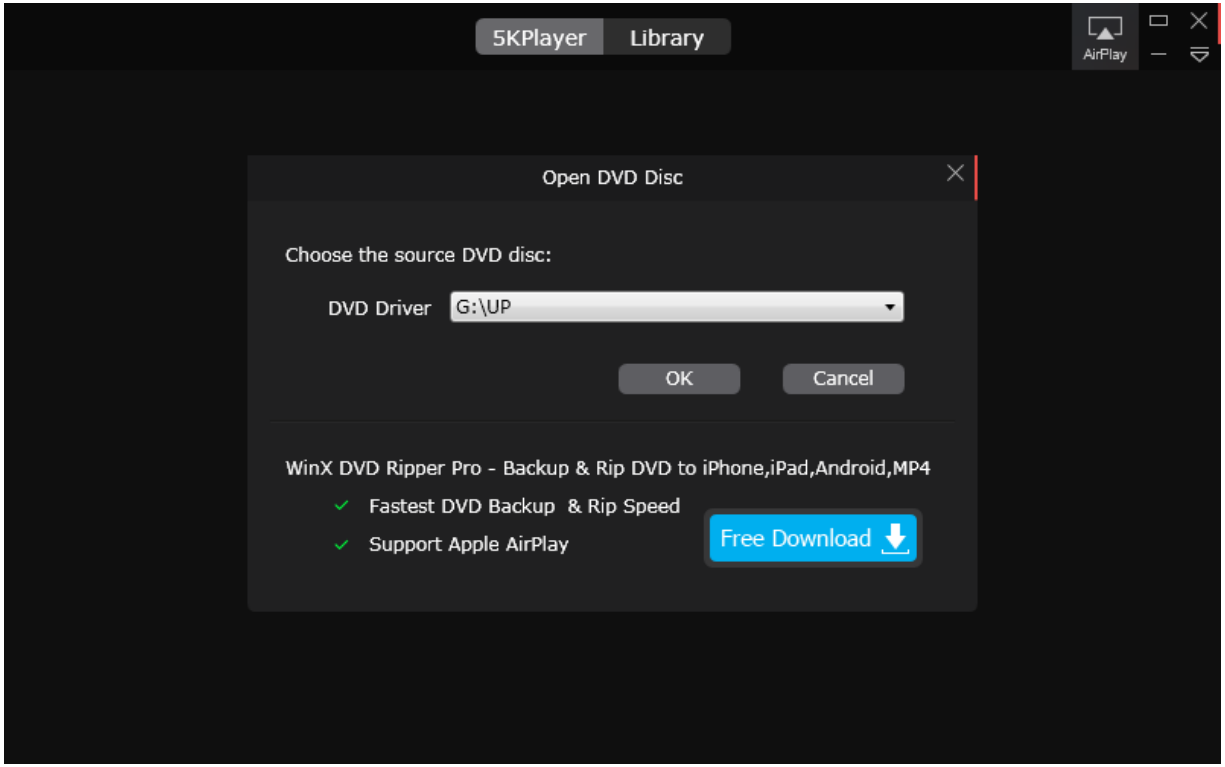
4. Right click on the media file and choose 5KPlayer to open. Once a video file is opened, 5KPlayer will be made as the default player for your computer. You can double click your media file it supports to open with 5KPlayer.

5. Right click on the main interface. Right click on the main interface of 5KPlayer and choose Open Media File. Locate the media file and click Open to play.

6. Open music/video with keyboard combinations:
Ctrl + O: Open video
Ctrl + M: Open music

How to play DVD via 5KPlayer?

There are three ways to play a DVD disc via 5KPlayer.

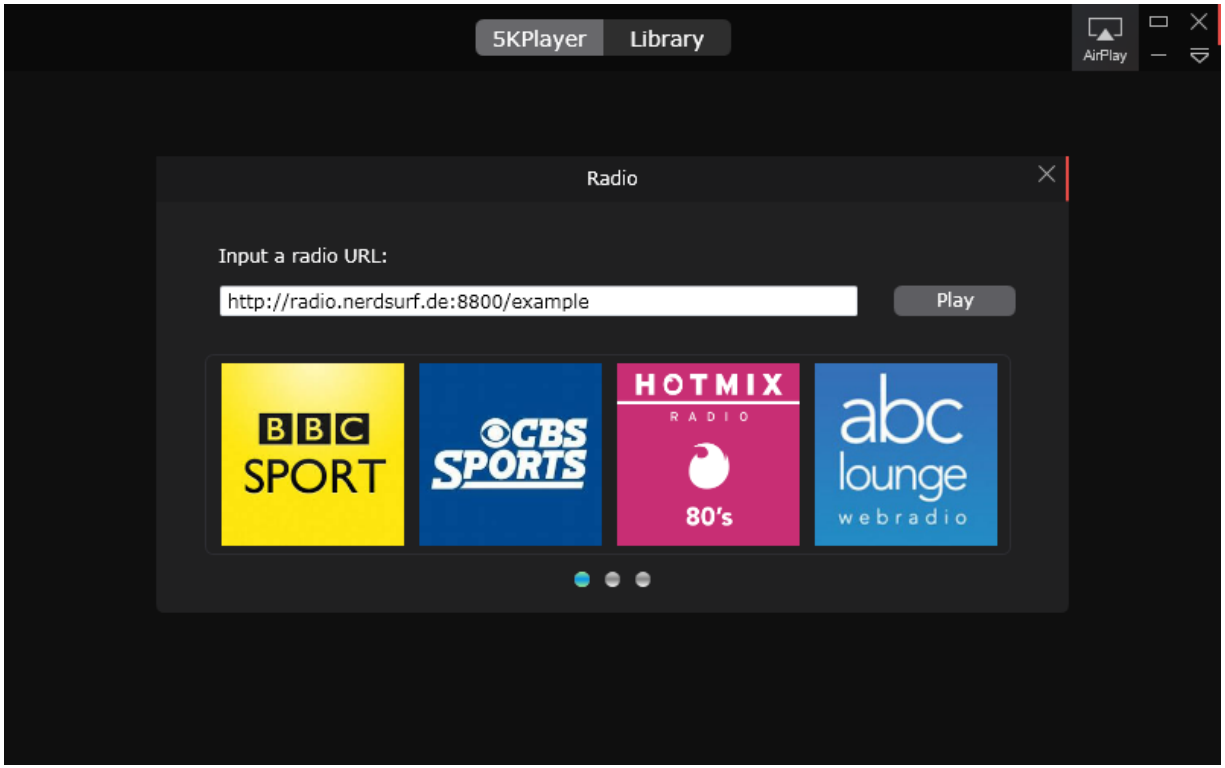


1. Click the DVD icon in the main interface of 5KPlayer to load a DVD in DVD drive for playback and click Open to play. PS, if you want to play DVD disc on your iPhone, iPad and other devices, please try WinX DVD Ripper.

2. Go Menu -> File -> Open DVD Disc. You are also able to open a DVD VIDEO_TS folder in Menu -> File -> Open VIDEO_TS.

3. Open music/video with keyboard combinations:
Ctrl + D: Open DVD
Ctrl + T: Open VIDEO_TS

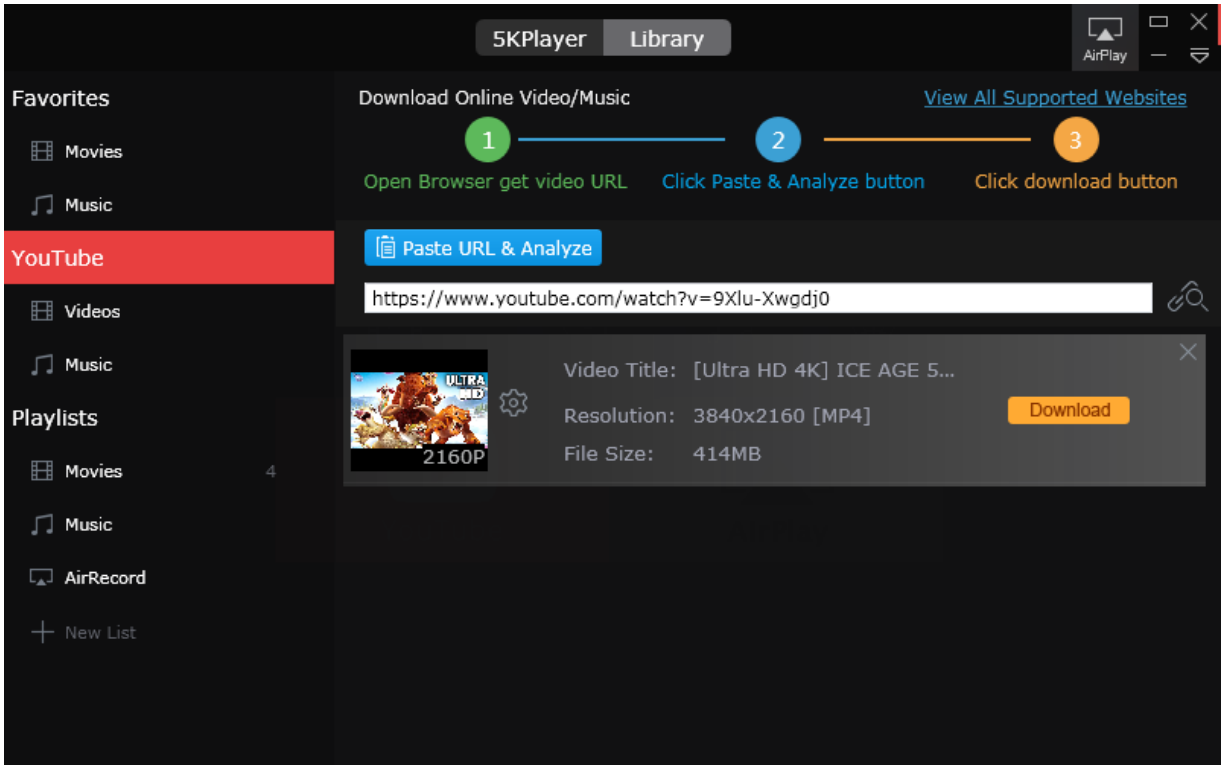
How to listen to radios with 5KPlayer?



Step One: Click the Radio icon in the main interface of 5KPlayer.

Step Two: Copy and Paste a radio URL and click Play. BBC Sport Live, CBS Sports Radio, NBC Sports and music Radios are preset in the program, you can just double click the icon to listen to radios you like.

How to download videos from YouTube, Facebook, Vimeo and more

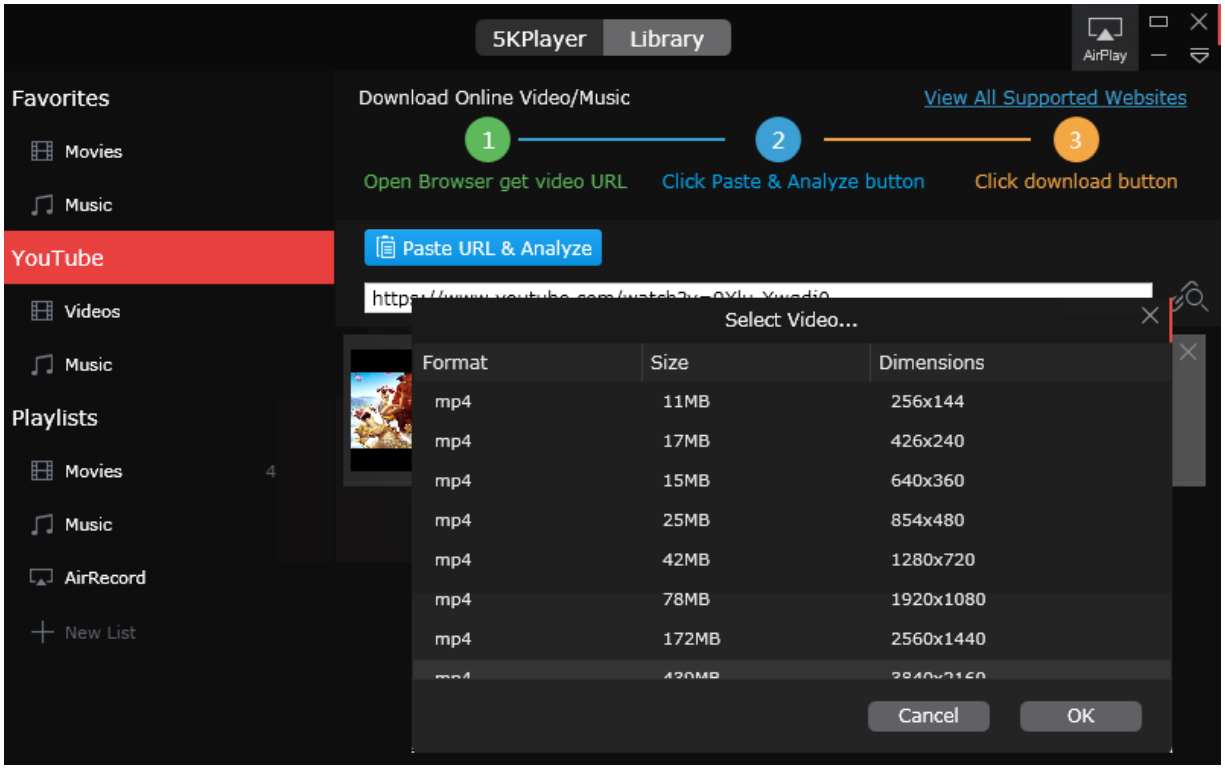


Step One: First, go to the YouTube page containing the video you want to save.

Step Two: Open 5KPlayer and click the YouTube tab. Click Paste URL & Analyze.

Step Three: Click Download button to download YouTube videos.

Tip: You can free to choose any video format and resolution available in the original YouTube video with the gear icon.



How to download video and convert to MP3, AAC

5KPlayer enables you to convert the downloaded videos as well as the videos in the playlists to music in the format of MP3 and AAC. After you finished the video downloading process, you just need to move your mouse to the video you would like to convert, then the "Convert" tab will be appeared. Choose the audio format you prefer then you will get the music file.
